

It is our pleasure to invite you to a **Mini-symposium on Emulsion Technology** to be held on November 12, 2009 at Wageningen University. We were able to attract interesting presenters who cover a wide range of new emulsification technologies, and emulsion related products.

The programme:

13:30 - 14:00 Welcome / coffee / tea

14:00 - 14:30 EDGE emulsification technology, by *Koen van Dijke*
(Food Process Engineering group, Wageningen University)

14:30 - 15:00 Colloidal assembly in microstructures, by *Luben Arnoudov*
(Unilever Research, Vlaardingen)

15:00 - 15:30 Microchannel emulsification, by *Isao Kobayashi*
(National Food Research InstituteTsukuba University, Japan)

After the presentations there is time for one-on-one discussions.

The symposium will be held in the Lecture room 54 in Biotechnion ([Wageningen UR building 307](#))

Presenter information:

Koen van Dijke is working within the Food Process Engineering group of Wageningen University, and will defend his PhD on EDGE and other microtechnological emulsification techniques on November 13th.

Luben Arnoudov is a senior scientist at Unilever Research Vlaardingen and he works amongst others on the use of microstructures for emulsion formation.

Isao Kobayashi is associated professor at the advanced Food Technology Lab, of the National Food Research Institute in Tsukuba, Japan, and his specialisation is straight through microchannel emulsification.

Registration:

Please let us know if you plan to attend the mini-symposium. Ideally, send a message to Joyce Krauss our secretary (joyce.krauss@wur.nl) or to Karin Schroen (karin.schroen@wur.nl). If you cannot attend the mini-symposium but are interested in the thesis of Koen van Dijke or any of our other PhD students, feel free to send us your full postal address and indicate which work you are interested in.

As mentioned, the public PhD defence of Koen van Dijke is scheduled to take place on November 13th, and more specifically at 13:30h, in the aula of Wageningen University. Those of you interested are very welcome to attend the ceremony.

With kind regards,
on behalf of Prof. Remko Boom
