

VLAG PhD Council

presents

A new Lunch Lecture about Working in Industry after your PhD From the perspective of The Professional

If you consider working in Industry after your PhD, then make sure to catch this lunch lecture! We are honoured to present Dr. Ben van Schaijk, Research Scientist at Merial. He offers his first hand knowledge and a fresh perspective not only on the differences between working in Academia and Industry, but especially what it takes to start in Industry.

Dr. Ben van Schaijk

Ben completed his PhD at Radboud UMC on malaria in 2008, and found his way to industry after two postdoc positions. His main interest lies in molecular microbiology and vaccine development. As someone participating in multiple PhD projects and being involved in selecting and hiring new colleagues, he can tell you like no other exactly what one would need for a career in industry in this interactive lunch lecture.

The Company: Merial

Merial is a world-leading, innovation-driven animal health company, providing a comprehensive range of products that focus on disease prevention and overall health and wellness in animals. Merial has three main business areas: pets, farm animals and veterinary public health, targeting over 200 diseases and conditions across a variety of species. Merial operates in more than 150 countries worldwide.
