PROGRAMME - Exposure Assessment in Nutrition Research: 7 March – 10 March 2022

	Monday March 7	**Tuesday March 8**	**Wednesday March 9**	**Thursday March 10**
09.00-09.45		Innovations in methods - Elske Brouwer	Energy-adjustment -Pieter van 't Veer	**E-learning: 2A/2B**
09.45-10.30		Biomarkers of exposure -Michiel Balvers	Handling measurement error in confounding variables -Edith Feskens	**E-learning: 2B**
10.30-11.00		Break	Break	Break
11.00-13.00		**E-learning: 1A/1B**	**E-learning: 1B/2A**	**E-learning: 2B**
13.00–14.00		Lunch break	Lunch break	Lunch break
14.00-14.45	Welcome and intro-duction participants and staff -Jeanne de Vries	Modelling long-term intake using short-term measurements -Kevin Dodd	The OPEN biomarker study : evaluating the structure of dietary measurement error -Kevin Dodd	Regression calibration for univariate and multivariate dietary exposures -Kevin Dodd
14.45-15.30	Dietary assessment methods and assignment Jeanne de Vries	Dietary monitoring: evaluation of energy and nutrient intake -Caroline van Rossum	Assignment 'Validation Studies Pooling Project' -Pieter van 't Veer	Take home messages and future perspectives -Pieter van't Veer -Kevin Dodd
15.30-16.00	Break	Break	Break	Closing
16.00-18.00	**E-learning: intro/1A**	**E-learning: 1B**	**E-learning: 2A**	

Individual consultation sessions will be scheduled during the time blocks reserved for e-learning
