

# Lunch Lecture

The Graduate School

**waag society**

institute for art, science & technology

## DIYBio: Pieter van Boheemen

Pieter is a project developer for Waag Society's Open Wetlab. In his work he mixes his Genomics degree with lots of experience in IT. He gets his every day inspiration from working with great people, then do cool stuff to maximize everyone's motivation and performance.

Pieter agreed to meet VLAG PhD students and explain them the concept of Do It Yourself (DIY) Biology. In short, the concept was created to bring research to the public and build the bridge between different scientific fields. In VLAG we also believe that sharing our network and knowledge are one of the important aspects of the personal grow, that is why this meeting may be very relevant for our students.

We will be happy to see you at the lecture!

12:15 –13:00  
28th of February 2014

ROOM C1005  
ORION, Building 103  
Bronland 1  
6708 WH Wageningen

**Lunch included for all  
participants**
