

VLAG PhD Council

Presents

Lunch Lecture by StartLife

Students and entrepreneurship:

StartLife is the first point of contact for new entrepreneurs in the agro, food and biobased economy. StartLife is an initiative to create business opportunities and employment, and to contribute to the development and application of sustainable technological innovations.

In this lunch lecture StartLife will show us how to start up new businesses with an idea or contribution to innovative technology and how does StartLife help making accessible pre-seed loans for the creation and development of a company.

Join us for inspiring talk & free lunch!
