

Lunch lecture: Women in Science A leaky pipeline?

Despite noticeable advances towards gender equality, women in science still form a minority with a percentage of 29% of the world's researchers. Although equality in graduates from PhD programmes is more balanced (46%), the number of women who continue in research significantly decreases, especially in the fields of science, technology, engineering and mathematics (STEM)¹.

Three women with a great career in science will reflect on their experiences and inspire us with their story.

Our speakers:

Dr. Yuling Bai, Dr. Ivonne Rietjens and Dr. Elinor Scott

Join us!

Leaky pipeline or drip irrigation system, NuStem, March 2018

Dr. Yuling Bai,

Professor, personal chair at Plant Breeding.

Dr. Ivonne Rietjens,

Professor, chair at Toxicology.

Dr. Elinor Scott,

**Associate professor at Biobased Chemistry
and Technology.**

Tuesday,

April 23rd 2019

Location: Impulse,
speaker's corner

Time: 12:00 – 13:30

Free lunch included!

¹ [UNESCO institute for statistics](http://unesco.org)

Register before the 15th of April via this link:
